The Italian team and students have been working on the plan of the *Trivial Pursuit Game*. In particular, teacher Mazzeo has been devising the layout of the cards in co-operation with the Portuguese teachers dedicating to this task. Students are having fun imagining and creating pictures to be drawn on the back of the cards, according to subjects chosen: Literature, History, Science, Music and Cuisine. Partners have also decided on one more subject to be included, i.e. the European Union.

While students are working on the board design, teachers are also helping them study the topics that are at the core of the game: themes that link the history and culture of the two countries of the Partnership, namely the 25th of April (symbolic date of regeneration and freedom), the traditions of literature and popular music (Portuguese fado and the Italian Festival of Sanremo), the theme of emigration and other common topics of interest.

As for the organization of the mobility, the co-ordinator of the Italian team, made sure that all Portuguese students could receive welcome and hospitality in Italian host families, by adding a number of families to the number of those that make up the group. And so, by Xmas time, all Portuguese students received their contacts for their future intercultural experience in Pomezia.
