STATISTICAL ANALYSIS: FINAL QUESTIONNAIRE - STAFF

Smartpack – Comenius bilateral partnership 2013-2015

Some considerations on the results:

- The bilateral partnership Comenius SMARTPACK has had a great impact on teachers and on the institutions involved. Staff members were interested in the themes addressed and, generally, enjoyed working to and for this project. Intercultural competences came out reinforced.
- Communication between partners was kept on a regular basis and, apart from mobilities, it was mainly assured by email.
- The work plan was fully achieved and even if sometimes it was not possible to incorporate all ideas – though valuable and interesting – into a project that involves two institutions and part of the local communities as well, all participants were listened to and efforts were made, at every occasion, to balance suggestions and perspectives.
- There is a very complete webpage containing all the information on the project and dissemination has accompanied the several stages of the project through newsletters, meetings, etc.
- Participants feel pleased with the final products and the mobilities were considered to be of great importance.
1 – This project was useful for my institution.

- Strongly Agree: 33%
- Agree: 67%

2 – The project was relevant for my region and/or my country.

- Strongly Agree: 17%
- Agree: 73%
- Disagree: 8%
3 – The themes addressed were interesting.

4 – I had no difficulties working on the Project.
5 – Communication between partners was good.

6 – Communication between partners was efficient.
7 – The coordinator communicated with partners on a regular basis.

8 – The work plan was successfully achieved.
9 – The work plan listed the expected products and results of the project.

10 – While discussing and dividing the tasks, my ideas were also taken into account.
11 – Apart from meetings, communication was held mainly by e-mail.

12 – I felt deeply motivated since the beginning.
13 – My colleagues were as involved as I was.

14 – Mobilities were an important way of sharing experiences.
15 – The project has had a big impact in my school.

16 – There was sufficient inside information on the situation in the schools in order to appreciate the contributions of the partner institutions.
17 – The technical communication levels of partners were taken into account.

18 – The final products of this project please me.
19 – There is a leaflet, brochure or CD/DVD with information or final product of the project.

20 – There is/are newsletter(s) about the project.
21 – I am proud of being a member of this team.

22 – I have also improved my knowledge of the English Language.
23 – I have acquired and improved new skills.

24 – There is a project webpage and I feel pleased with it.
25 – The partnership has disseminated the project and its final products in their own countries.

26 – I have enjoyed working on this project.
27 – I have made new friends / established interesting relationships during this partnership.

28 – I envision another project with this team in the future.
29 – I am more aware of the importance of intercultural competences in general.

30 – By addressing European Citizenship, intercultural competences and entrepreneurial culture, this project improved my knowledge on these issues.
31 – I believe intercultural competences are important.

32 – I hope to participate in other projects in the future.
